

## Northeast Florida is America's Logistics Center--

one of the only centrally located East Coast regions offering all four pillars of logistics: rail, air, maritime and highway. This makes the seven-county region ideal for international trade, as well as logistics and supply chain management investments and employment.

Three major railroads—CSX, Norfolk Southern and Florida East Coast Railway—use Jacksonville as a railroad hub/interchange. Three major interstates— I-95, I-10 and I-75—connect the area with every part of the country, and Jacksonville's deep-water port has three public marine terminals. Currently, 10,724 workers such as longshoremen and truck drivers are part of maritime operations.

The Logistics industry has been steadily rising since Q1 of 2013 (JOBS EQ 2020). Florida is home to 61,000 exporters, the second highest number of exporters in the U.S. Jacksonville itself boasts a strong intermodal system with multiple cargo terminals at JAXPORT capable of handling container, automobile, bulk, breakbulk and refrigerated cargoes.

The occupations shown below represent a cross-section of entry-, mid- and executive-level positions within the industry.
